note_MI	## Indicator								
MI_ShortName	Short name of the indicator								
MI_Description	Longer description of the indicator (please give enough detail to understand how the indicator is assessed)								
MI_Dimension	What latent dimension(s) of research is it supposed to measure in your use case?	methodological rigor	scientific impact	societal impact	productivity / quantify	don't know	Other (add below)		
MI_Dimension_Other	Other: (optional)								
MI_ObjectiveMeasure	Is it objectively measurable? (i.e., would any rater arrive at the same conclusion?)	Objectively / with very high interrater agreement	Subjective rating scale with clearly defined options	Mostly subjective					
MI_AssessmentTarget	To which target of assessment is the indicator applied? <details> <summary> <i>More information (click)</i></summary> Often evaluations of lower level units are aggregated to higher units (e.g., citation counts of papers are aggregated on the person level). Here we ask, to which unit an indicator is applied to. For example, are you looking for the best poster at a conference (unit of assessment: single research output), or at the most productive researcher (unit of assessment: researcher; even if the input to this evaluation is based on their papers).</details>	Publications (in a broad sense; including papers, preprints, books, chapters, manuals, ...)	Data sets	Research Software	Researchers (persons)	Larger units of people (i.e., teams, departments, entire institutions)	Other (add below)		
MI_AssessmentTarget_Other	Other: (optional)								
MI_Purpose	For which purpose is that indicator (primarily) used in your institution?	Academic grading	Academic hiring	Job promotion to a higher position	Performance-oriented payments and rewards	Awards	Funding decisions	General performance evaluation	Other (add below)
MI_Purpose_Other	Other: (optional)								
MI_Regulations	For all purposes that you selected in the previous question: Are there mandatory regulations or policies for using this indicator?	Yes	No	don't know					
MI_Regulations_Policy	Please specify the level of the policy (country, institution, ...):								
MI_Regulations_Policy_Link	If possible: Please provide a link to the document.

MI_Provider	Who provides this indicator? What is the data source? (Select all that apply)	Our institution measures the indicator, based on openly available information.	The underlying information for the indicator is openly available, but prepared by a service provider.	The information is not openly available, we buy it from a commercial company.	Other (add below)	don't know			
MI_Provider_Other	Other: (optional)								
MI_Retrieve	How is the information retrieved in the assessment exercise?	Automatic retrieval (e.g. from a database or API)	Needs manual/human processing	A mixture of automatic and manual	don't know				
MI_Weight	How strongly is that indicator weighted compared to other used indicators? How important is it?	less important than other indicators	equally important as other indicators	more important than other indicators	don't know				
MI_Essential	Is a certain performance on this indicator **essential** (i.e., a certain number, such as "at least 10 published papers" *must* be reached) or **desirable** ?	essential	desirable	don't know					
MI_Use	Is that indicator primarily used in an **formal/explicit** way (e.g., as part of an official policy), or rather **informally/implicit** ?	In a **formalized/standardized** way	In an **informal** way (e.g., committee members are counting publications, although this is not an "official" indicator)						
MI_Validity	In your personal opinion: Is that indicator **valid** for its purpose? (Note: This is about the personal opinion of the person filling out the survey).	valid	mostly valid	To some extent valid	not valid				
MI_GeneralComment	General comment: What are potential **downsides or biases** of that indicator? What are **positive** aspects? Any other comments? (optional)
